

## PROFILE

# THE ECONOMIC BENEFITS OF LOWERING PC SOFTWARE PIRACY

Sponsored by Business Software Alliance®

## POLAND

January 2008

**Ten point reduction in PC software piracy would deliver nearly 1,900 new jobs, \$110 million in tax revenues, and \$1.1 billion in economic growth in Poland**

In 2007, Poland, a country of more than 38 million people, spent \$8.1 billion on information technology (IT) – computers, peripherals, network equipment, packaged software and IT services. That spending accounted for 2.2% of gross domestic product (GDP), supported more than 12,000 IT companies with nearly 92,500 IT industry employees, and helped generate \$2.8 billion in IT-related taxes.

Yet the IT sector's contribution to the Polish economy could be even larger if Poland's PC software piracy rate were to be lowered 10 percentage points over the next four years, creating an additional 1,885 jobs, \$1.1 billion in local industry revenues and \$110 million in additional tax revenues for federal, regional, and local

## Benefits from Lowering PC Software Piracy In Poland

Benefits of lowering software piracy  
from 57%\* to 47% from 2008-2011

\* 2006 PC Software Piracy Rate, IDC Global Software Piracy Study

governments.

This incremental boost to the economy would add highly skilled jobs to the labor force, support the creation of new companies, and fund public services. Because most of the benefits accrue to services and channel firms, most of the benefits from lowering piracy stay within the country.

Lowering PC software piracy delivers such benefits because other sectors derive revenue from working with, installing, servicing, and reselling software.

Therefore, a 10 percentage point drop in PC piracy not only impacts the performance and economic contributions of the overall software industry, but also ripples outward into the IT services and distribution sectors, each of which is larger than the software industry itself.

### Study Background

The cornerstone of this research is IDC's Piracy Impact Model (PIM), which takes inputs from IDC's market research around the globe on IT spending and software piracy along with other information on IT employment levels and IT-related taxes. IDC has been conducting economic analysis on the impact of IT and software on local economies since 2002. Key inputs to the study include:

- ☒ IDC forecasts of IT spending by hardware, software, and services.
- ☒ IDC estimates of imports and exports of hardware, software, services.
- ☒ Macroeconomic data on GDP, workforce, population, tax rates, and total government tax receipts.
- ☒ IDC estimates of services and distribution channel activity that revolves around software.
- ☒ The annual BSA-IDC Global Software Piracy Study which estimates rates of packaged PC software piracy around the globe. The most recent version can be found at [www.bsa.org/globalstudy](http://www.bsa.org/globalstudy).

For more information on the study methodology see, *The Economic Benefits of Lowering PC Software Piracy: Methodology and Definitions*, published in January 2008

### The Economic Benefits of Lowering PC Software Piracy

	2006	2007	2008	2009	2010	2011	2007-2011 CAGR	2008-2011 Cumulative
<b>PC Software Piracy (BSA Rate)*</b>								
Current Level	57%	57%	57%	57%	57%	57%		
Proposed Lower Rate			54.2%	51.7%	49.2%	46.7%		
<b>IT Spending (US\$M)</b>								
Without Piracy Reduction	\$6,646	\$8,126	\$9,069	\$10,059	\$11,073	\$12,147	10.6%	
With Piracy Reduction		\$8,126	\$9,161	\$10,259	\$11,402	\$12,625	11.6%	
Difference			\$91	\$200	\$329	\$478		\$1,099
<b>IT Industry Employment</b>								
Without Piracy Reduction	80,021	92,489	99,954	107,418	114,711	122,040	7.2%	
With Piracy Reduction		92,489	100,348	108,256	116,047	123,925	7.6%	
Difference			394	838	1,336	1,885		
<b>IT Related Tax Revenues (US\$M)</b>								
Without Piracy Reduction	\$2,373	\$2,766	\$3,074	\$3,399	\$3,754	\$4,152	10.7%	
With Piracy Reduction		\$2,766	\$3,084	\$3,420	\$3,787	\$4,200	11.0%	
Difference			\$9	\$20	\$33	\$48		\$110
