

PROFILE

THE ECONOMIC BENEFITS OF LOWERING PC SOFTWARE PIRACY

Sponsored by Business Software Alliance™

SOUTH AFRICA

January 2008

Ten point reduction in PC software piracy would deliver more than 1,200 new jobs, \$70 million in tax revenues, and nearly \$900 million in economic growth in South Africa

In 2007, South Africa, a country of more than 43 million people, spent nearly \$9.0 billion on information technology (IT) – computers, peripherals, network equipment, packaged software and IT services. That spending accounted for 3.4% of gross domestic product (GDP), supported more than 14,000 IT companies with nearly 84,000 IT industry employees, and helped generate \$2.9 billion in IT-related taxes.

Yet the IT sector's contribution to the South African economy could be even bigger if South Africa's PC software piracy rate were to be lowered 10 percentage points over the next four years, creating an additional 1,210 jobs, \$895 million in local industry revenue and \$69 million in additional taxes revenues for federal, regional, and local governments.

Benefits from Lowering PC Software Piracy In South Africa

Benefits of lowering software piracy
from 35%* to 25% from 2008-2011

* 2006 PC Software Piracy Rate, IDC Global Software Piracy Study

This incremental boost to the economy would add highly skilled jobs to the labor force, support the creation of new companies, and fund public services. Because most of the benefits accrue to services and channel firms, most of the benefits from lowering piracy stay within the country.

Lowering PC software piracy delivers such benefits because other sectors derive revenue from working with, installing, servicing, and reselling software.

Therefore, a 10 percentage point drop in PC piracy not only impacts the performance and economic contributions of the overall software industry, but also ripples outward into the IT services and distribution sectors, each of which is larger than the software industry itself.

Study Background

The cornerstone of this research is IDC's Piracy Impact Model (PIM), which takes inputs from IDC's market research around the globe on IT spending and software piracy along with other information on IT employment levels and IT-related taxes. IDC has been conducting economic analysis on the impact of IT and software on local economies since 2002. Key inputs to the study include:

- ☒ IDC forecasts of IT spending by hardware, software, and services.
- ☒ IDC estimates of imports and exports of hardware, software, services.
- ☒ Macroeconomic data on GDP, workforce, population, tax rates, and total government tax receipts.
- ☒ IDC estimates of services and distribution channel activity that revolves around software.
- ☒ The annual BSA-IDC Global Software Piracy Study which estimates rates of packaged PC software piracy around the globe. The most recent version can be found at www.bsa.org/globalstudy.

For more information on the study methodology see, *The Economic Benefits of Lowering PC Software Piracy: Methodology and Definitions*, published in January 2008.

The Economic Benefits of Lowering PC Software Piracy

	2006	2007	2008	2009	2010	2011	2007-2011 CAGR	2008-2011 Cumulative
PC Software Piracy (BSA Rate)*								
Current Level	35%	35%	35%	35%	35%	35%		
Proposed Lower Rate			32.8%	30.3%	27.8%	25.3%		
IT Spending (US\$M)	\$8,249	\$8,984	\$9,614	\$10,208	\$10,966	\$11,673	6.8%	
Without Piracy Reduction		\$8,984	\$9,687	\$10,372	\$11,234	\$12,063	7.6%	
With Piracy Reduction			\$73	\$164	\$268	\$389		\$895
Difference								
IT Industry Employment	78,823	83,702	87,522	90,666	95,084	98,613	4.2%	
Without Piracy Reduction		83,702	87,770	91,201	95,938	99,823	4.5%	
With Piracy Reduction			248	535	854	1,210		
Difference								
IT Related Tax Revenues (US\$M)	\$2,579	\$2,921	\$3,275	\$3,793	\$4,065	\$4,408	10.8%	
Without Piracy Reduction		\$2,921	\$3,281	\$3,806	\$4,085	\$4,438	11.0%	
With Piracy Reduction			\$5	\$13	\$21	\$30		\$69
Difference
